EXPERIENCE

EXPERIENCE

September 2024 - December 2024
Front-End Web Development
Course
REDI SCHOOL DENMARK

- Frontend Web Development Course is organized by ReDI School, Denmark

- [ReDI School website link](#) 

July 2024 - October 2024
Front-End Web Developer
**CHINGU-VOYAGE V50 & V51 -
TIER 3 - GROUP PROJECT**

- Group of eight developers and one UI/UX designer from USA and Europe
- We built a full-stack React web app called Save Bees. Using this app users can help save bees to save our future generations
- We have also implemented responsive web app with dark/light theme design
- Our entire app is divided into small components. We used JIRA board to assign tickets to our team members, track our progress and to maintain backlog
- I worked on setting up the basic layout using tailwind CSS, created reusable components for the team to build our Bee web app. I have also worked on setting up Redux store, RTK query on our Bee app project. We have used onrender.com to host our project online

November 2023 - December 2023
Design Thinking Workshop
**UI/UX DESIGN THINKING
WORKSHOP**

- The workshop was conducted by ReDI School, Denmark and TCS (Tata Consultancy Services), Denmark
- Group of four students from Denmark as a team, we designed a mobile app called Help4You using Figma. The app is for the users to find a psychologist online based on their preferred languages and timezones
- Learned wireframing, prototyping using Figma to build a mobile app together as a team

- [ReDI School website link](#) 

October 2023 - November 2023
Front-End Web Developer
**CHINGU-VOYAGE V46 - TIER 2 -
GROUP PROJECT**

- Group of four developers and one UI/UX designer from Europe
- We built a React web app called Zest. Using this app users can search recipes by its ingredient name
- We have implemented responsive design and dark/light theme design
- We divided the app into small components and used Trello as a project backlog and google docs as a meeting backlog
- My task was to implement Redux store, header and footer & The project is hosted online using Netlify

- [GitHub Repo Link](#)  [Hosted On](#) 

October 2023 - November 2023
Front-End Web Developer
**CHINGU-VOYAGE V46 - TIER 1 -
GROUP PROJECT**

- Group of three developers and one UI/UX designer from Spain and London
- We built a web application using Semantic HTML, CSS and JavaScript. The app is called ReciPick, where users can search recipes by its ingredient name
- We divided the tasks to build this app together & we used Jira as a project backlog and google docs as a meeting backlog
- My task was to build recipe cards, modals, header and footer & The project is hosted online using Netlify

- [GitHub Repo Link](#)  [Hosted On](#) 

August 2023 - September 2023
Front-End Web Developer
**CHINGU-VOYAGE V45 - GROUP
PROJECT**

- Group project with four remote team members from Europe
- We built a react web app called Fireball Meteorite Strikes. This web app is to see meteorite data from NASA database
- We divided the app into small components and used Trello as a project backlog and google docs as a meeting backlog
- My task was to build a search component & implement APIContext. APIContext was new for me to learn and implement on this project & we used Netlify to host our project online

August 2023 - September 2023
Front-End Web Developer Intern
EMOGRAPHICS

• [GitHub Repo Link](#)  [Hosted On](#) 

- Building new features for emologic web app under development
- React, TypeScript, Tailwind
- [Emographics website link](#) 

July 2023 - August 2023
Ruby On Rails Developer Intern
MAKEITGOODAGAIN (MIGA)

- Building new features (UI) for MIGA using Ruby on Rails, slim and CoffeeScript
- Ruby on Rails, slim, CoffeeScript
- [MakeltGoodAgain \(MIGA\) website link](#) 

October 2021 - August 2022
Front-End Web Developer
JO INFORMATIK - HELSINGØR

- Public FilArkiv - CSS, WCAG - Web Accessibility
- Blazor components, SCSS, C#
- [Public FilArkiv](#) 

September 2020 - October 2021
Front-End Web Developer
JO INFORMATIK - HELSINGØR

- QGIS Python plugin using QT Designer and Python
- Kortkomponent using HTML, CSS, Javascript
- Vue Kortkomponent using Vue, Typescript
- [GitHub Repo Link](#) 

October 2019 - November 2019
Front-End Web Developer
CHINGU-VOYAGE 12 - SOLO
PROJECT

- Built a cloned vaersgo single page website using HTML,CSS and React
- It is a ecommerce website, which can be used to purchase home appliances
- Learned to use lazy loading for the image heavy site like this and used Grid layout and practiced to host this site using Netlify
- [GitHub Repo Link](#)  [Hosted On](#) 

September 2019 - October 2019
Front-End Web Developer
CHINGU-VOYAGE 11 - SOLO
PROJECT

- Built a cloned kickstarter single page website using HTML,CSS and React
- Applied previous projects React knowledge to finish this solo project and hosted the site using Heroku
- [GitHub Repo Link](#)  [Hosted On](#) 

June 2019 - July 2019
Front-End Web Developer
CHINGU-VOYAGE 09 - GROUP
PROJECT

- Group project with two remote team members
- Built a dynamic web app to showcase shoes using HTML,CSS and React
- We divided the app into different components and used Trello for project management
- Learned React basic and applied the knowledge to build this shoe app and practiced to use Trello and learned to host the site using Heroku
- [GitHub Repo Link](#)  [Hosted On](#) 

May 2019
Front-End Web Developer
CHINGU-VOYAGE 09 -
PREWORK-SOLO-PROJECT

- Built a chrome extension called INITAB using HTML,CSS and JavaScript
- First time experience to build and style an extension and used JavaScript to implement a live clock
- [GitHub Repo Link](#)  [Hosted On](#) 

March 2019 - April 2019
Front-End Web Developer
CHINGU-VOYAGE 08 - GROUP
PROJECT

- First time experience to work with two remote team members from England and Uganda
- Built a cloned Chingu single page website using HTML, CSS and JavaScript
- Used GitHub board to track our tasks
- Learned to use gitHub board, shared the workload and completed the project together with my team members
- [GitHub Repo Link](#)  [Hosted On](#) 

February 2019
Front-End Web Developer
CHINGU-VOYAGE 08 -
PREWORK-SOLO-PROJECT

- Built TickyBot website using HTML, CSS and vanilla JavaScript
- Learned to use simple vanilla javascript and media queries
- [GitHub Repo Link](#)  [Hosted On](#)
